

35th IGC Cape Town, South Africa

Scientific Programme

Professor Jay Barton
Chairperson, Scientific Programme
IGC-2016
Jay.Barton@telkomsa.net

Although 2016 seems a long way away, I am seeking input from interested persons concerning the structure and content of the Scientific Programme.

The Scientific Programme consists of Oral and Poster Presentations, Short Courses, Workshops and Field Trips.

As much as possible, synergy is being planned among these elements so that Field Trips, for example, are linked to Oral and Poster Presentations.

As a first approximation, the themes and symposia of Oral and Poster Presentations will be similar to those of IGC-2012 (<http://www.34igc.org/scientific-themes-symposia.php>) but modified to have a distinct African flavour.

The field trips will have an African perspective and are being organized by Dr. Chris Hatton (chatton@geoscience.org.za) and Dr, Sharad Master (sharad.master@wits.ac.za).

Please direct any comments and suggestion to me at the e-mail address above or, if you prefer with regard to field trips, to Chris and Sharad at their e-mail addresses, cc'ing me.
